

Builtrite Bypass Utility Grapples are designed for handling a wide variety of wood and other materials including logs, brush, railroad ties, pallets, etc. With their by-passing tines, they excel in picking up both individual items and multiple items.

Key features include:

- 3 rotation options including 280° non-continuous, 360° continuous rotation with Indexator & 360° continuous with heavy duty bearing, high torque motor and a high pressure hydraulic swivel.
- High tensile steel (100,000 Yield Strength) used on grapple arms.
- Oversized, hardened cylinder and arm pivot pins with replaceable bushings.
- Heavy duty cylinders (high pressure and low pressure options).
- Easily accessible, yet well protected grease zerks.
- Made in the U.S.A., at our Two Harbors, Minnesota facility.

If you're looking for the toughest, most durable grapple on the market, look no further...Make it a **Builtrite**.
